

WORLD'S QUIETEST • WORLD'S STRONGEST

# vs. Others

**THE MOST WINDOW DESIGNS**

More window insert design choices than any other Garage Door Manufacturer. Over 39 different choices - The Most!

~~THE MOST WINDOW DESIGNS~~

Most offer the standard 10 Designs. Not very much selection to choose from. Hard to match your house design with limited selection.

**POLY INSULATED**

Super Poly Back Insulated 1/4" thick back skin is so strong you can walk on it! Made with full sheets of foam. More strength, no squeak. Solid bonded construction. This type of design adds strength to the door plus our Formula 124 construction makes it super strong.

~~POLY INSULATED~~

Thin pieces of paper-thin vinyl backed foam, are inserted in a pan (non-insulated) door section. Not bonded, they move around, squeak and give no extra strength to the door. On top of that, it's so easy to poke a hole through the paper-thin vinyl backing. In a year, it turns yellow because it has no UV protection. Heat and light turn it yellow.

**STEEL BACK SANDWICH INSULATED**

Steel Back Insulated Models are the strongest in the industry. Formula 124 and 25 ga front skin and 25 ga back skin make these the thickest steel back doors in the industry. More dent resistant. Like a rolling steel wall to keep out the elements.

~~STEEL BACK SANDWICH INSULATED~~

28, 27, 26 ga thin steel back sandwich doors are the standard offered by most Garage Door Manufacturers. Thinner steel dents very easy and does not provide as much strength.

**SMOOTH NO WOODGRAIN TEXTURE MODELS**

Smooth, no woodgrain texture. Premium Models available in Flush Design plus Carriage House Design. A modern upgraded custom look found only here.

~~SMOOTH NO WOODGRAIN TEXTURE MODELS~~

Others do not offer a rigid smooth option like Unique.

**AUTHENTIC WOOD-LIKE MODELS**

Wood-like steel doors have an authentic real wood look. Dark finish color features a clear coat protection that is not found on other manufacturer's standard wood look type models. Longer lasting, real looking finish for year after year, enduring beauty.

~~AUTHENTIC WOOD-LIKE MODELS~~

No clear coat offering. Most do not look very authentic. A 2-coat process, not 3, looks more like paint than wood.
