WARRANTY AND CLEANING INSTRUCTIONS

SPRINGS - 3 YEARS

HARDWARE- 5 YEARS

DOOR- 15 YEARS

ANODIZED FINISH- 15 YEARS

**** (Must be kept Clean and Polished)**

A door is like your car or truck. It must be washed and cleaned/polished or waxed to look good year after year. Failure to do so is NOT a warranty issue. It is the owners lack of upkeep/maintenance issue.

Must be kept clean to keep your finish warranty valid.

Proper Maintenance Instruction.

*Anodized aluminum is easy to clean. Just hose down the surface with water using moderate pressure (use Garden hose NOT a pressure washer). Wash with a mild detergent or a car wash type soap cleaner. Use a very soft cloth or sponge (non-abrasive type). Wash/wipe left to right going with the brushed grain surface, VS up/down swirl motion. This is the recommended way to avoid scratching or leaving swirl marks. Rinse thoroughly when finished.

*To protect and polish the Clear Anodized surface, it is Highly recommended that you use a Stainless steel/Aluminum polish, which is easily found at The Home Depot and Lowes stores. ZEP brand works well and the stores have other brands that will do a similar job.

Please follow instructions found on the can. It is recommended to do this twice a year.

If you are near the ocean/beach in a salt type of environment, you should wash your door monthly to avoid the Salt build up and residues.

*Document each time you clean your Clear Anodized Brushed Aluminum Garage Door. Required at least Semi-Annually in the non-salt environments and Monthly in Salt/Beach coastal environments. A salt environment/salt atmosphere is anything within 1.5 miles of the coast/beach.

For proper lubrication/maintenance see Lube Instruction Sheet.
